There once had been a mistake in the publication of a wrong document, which has been corrected. Because of some mistakes in publishing, the most content of Professor James Byrne's paper (Ref.4.) had been wrongly typesetting and published online at Forensic Sci Sem, Vol. 7 No. 2., while the original correct article failed to be published in time. Since Professor James Byrne's paper (Ref.4.) is the only English reference for that article. It had been wrongly typed as the text and had not gotten valid proofreading. The wrong published document has been revoked and it has already published the correct manuscript online.

About this mistake, we have already replied to the Taylor press.

Authors of Forensic Sci Sem, Vol. 7 No. 2, who have downloaded the wrong version on the FSS official website, please go to the following address and download the corrected version. Please forgive us for the inconvenience for you.
